

## **NH Insurance Department Sets October/December 2015 dates for Network Adequacy Working Group**

The New Hampshire Insurance Department will convene its Network Adequacy Working Group on:

- Thursday, October 15
- Friday, December 11

Both meetings will take place from 2-3:30 p.m. in Room 100 of the Walker Building, 21 South Fruit St., Concord.

The Insurance Department is working to revise the current state rules that set out minimum standards for health insurance company provider networks, including the plans offered on New Hampshire's federally operated health insurance exchange.

The Department developed the current network adequacy rules in 2001 with help from a similar working group, composed of consumer representatives, hospitals, community clinics, physicians, nurses, and mental health providers, as well as all the major health insurance companies.
